SUMMARY

CJIS-cleared Systems Engineer with hands-on experience supporting secure, high-availability environments and integrating technology across distributed systems. Security+ (DoD 8570/8140 IAT Level II) certified with strong expertise in RHEL/Ubuntu administration, AWS, enterprise networking, and API-based system integrations. Proven ability to troubleshoot complex issues, support technical onboarding, and collaborate with cross-functional teams to resolve production incidents across VMS platforms, IP networks, and enterprise environments.

CERTIFICATIONS

CompTIA Security+ | RHCSA: in progress

- DoD 8570/8140 Compliant, validated knowledge in security, risk management, and enterprise/cloud security practices

SKILLS

Operating Systems: Red Hat Enterprise Linux (RHEL), Ubuntu, CentOS, Windows Server, Active Directory

Networking: TCP/IP, DNS, DHCP, VPN, SSH, RDP, firewalls, Nmap, tcpdump, Wireshark

Automation & Scripting: Python, Bash, PowerShell, YAML, JSON

APIs & Integration: REST APIs, API Testing (Postman), JSON Parsing, Webhooks, System Integrations, Troubleshooting API Requests/Responses

Cloud & Virtualization: AWS, Azure, Docker, Ansible, VMware

Security Tools & Framework: Nessus, Wireshark, AWS GuardDuty, SIEM, Incident Response, System Hardening

Video System: IP Cameras, DVR/NVR, RTSP, ONVIF, Cloud VMS

EXPERIENCE

Technical Support Engineer | Tier 1

Axon Fusus | Contract

Nov 2025 - Present, Hybrid, 40hrs

- Support secure, high-availability infrastructure in regulated law enforcement environments (CJIS-compliant).
- Resolve Tier 1 VPN, firewall, and DNS incidents to sustain uptime for mission-critical law enforcement systems.
- Administer Linux VMS and triage network issues across IP cameras, switches, and edge infrastructure.
- Analyze system logs, packet captures, and configuration data to accelerate root-cause analysis and reduce mean time to resolution (MTTR).
- Support third-party system integrations, collaborating with internal teams and external partners to troubleshoot and resolve technical issues.

Apprenticeship | Cybersecurity Fellow

The Knowledge House

Nov 2024 - Nov 2025, Atlanta, GA. 40Hrs

- Completed 400+ hours of hands-on cybersecurity training focused on enterprise defense, monitoring, and cloud security operations.
- Built and managed Linux VMs and labs to practice network hardening, system administration, and incident response.
- Performed threat detection and response simulations using SIEM tools, log analysis, and the MITRE ATT&CK framework in secure environments.
- Secured AWS environments, detecting EC2 issues, remediating vulnerabilities, and enforcing compliance via GuardDuty, Security Hub, and IAM.
- Documented security incidents and remediation actions, producing detailed reports for stakeholders and compliance review.

Technical Educator | IT & Systems Support

Bloomberg School District

Jan 2024 - Dec 2024, New Castle, DE. 40Hrs

- Implemented and supported assistive and educational technology systems, improving accessibility across diverse user environments.
- Designed and deployed technology-driven solutions (15+ IEP-based plans), increasing student performance by 25%.
- Trained staff on software tools, system usage, and technical workflows, improving adoption and operational efficiency.
- Collaborated with cross-functional teams to manage and support technology initiatives across multiple classrooms.
- Troubleshoot and resolved hardware, software, and user-level technical issues in a structured environment.

IT Help Desk Specialist

Discover Inc.

Nov 2020 - Dec 2023, Remote. 40Hrs

- Troubleshoot hardware, software, VPN, and RDP connectivity issues across 50+ endpoints monthly, reducing downtime and service disruption.
- Supported network connectivity and IP-based devices, ensuring reliable access to systems and internal resources.
- Supported remote system access and secure connectivity configurations across distributed environments.
- Administered Active Directory user accounts and access controls, enforcing role-based permissions and security policies.

EDUCATION

Innovation Fellowship - Cybersecurity Track

- 12-month program focused on cybersecurity, networking, cloud computing, and hands-on labs with Linux, AWS, Python, and SIEM tools.

B.S in General Biology

Pennsylvania State University • State College, PA
